### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brett Bornsen on June 25, 2004.

The application has been amended as follows:

in **claim 33**, line 4, --separated from and-- is inserted after "card" (first occurrence) and before "is".

### REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Applicant claims a method and system for registering warranties on products using phone cards, wherein a phone card with a phone card code is packaged with a separate product and further comprising the step of processing a product warranty registration and a phone activation at a point of sale terminal utilizing the phone card code. The prior art fails to disclose processing a product registration for a product separate from a phone by utilizing the phone card code at a point of sale terminal. Dorf discloses a multifunction card system that allows registration of a multifunction card at a point of sale terminal. However, Dorf fails to disclose packaging a phone card with a phone card code and separate product, wherein the separate product's warranty

information is processed at a point of sale terminal with a phone card code. Flickinger et al. discloses electronically registering product warranties. Like Dorf, Flickinger et al. fails to disclose packaging a phone card with a phone card code and separate product, wherein the separate product's warranty information is processed at a point of sale terminal with a phone card code. In an article in the Virginian-Pilot, Parker discloses that is well known in the art of phone cards to package phone cards with product as incentives for customers to send in their warranty cards. Parker further states that the phone cards are activated after consumers call or write with information on how they use the product. While Parker discloses packaging phone cards and separate products, Parker fails to disclose activating a product warranty with a phone card code at a point of sale terminal. For the reasons set forth above, no single reference or combination of references anticipate or make obvious the limitations required by claims 23-42. Therefore, claims 23-42 are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

WO 00/79496 A2 is cited of interest for disclosing a point of sale system that allows merchants to sell warranties on products.
